Tennis v3 Statistics Feeds

Table of Contents

Tennis v3 Statistics Feeds

We package our comprehensive stats collection into the following feeds, each focused on serving specific information needs:

Competition Info – Provides the name, id, and parent id for a given competition.

Competition Seasons – Provides historical season information for a given competition. Valid competition IDs can be found in the Competitions feed.

Competitions – Provides a list of all available tennis competitions.

Competitor Profile – Provides biographical information for a given player, including current rank, historical statistics, and competition participation.

Competitor Summaries – Provides previous and upcoming match information for a given competitor, including statistics for past matches and scheduling info for upcoming matches.

Competitor vs Competitor – Provides previous and upcoming matches between two teams including scoring information and match statistics.

Complexes – Provides all complexes with venue information.

Daily Summaries – Provides match information for a given day including scoring and match statistics.

Doubles Competitions Played – Returns doubles competitions played and the partners a competitor played with.

Doubles Race Rankings – Rankings for the ATP/WTA finals.

Doubles Rankings – Provides rankings in ascending order for doubles teams.

Live Summaries – Returns real-time updates for all currently live matches, including scoring and statistics.

Live Timelines – Provides a real-time play-by-play event timeline for currently live games.

Live Timelines Delta – Provides a 10 second live delta of game information, including scoring and a play-by-play event timeline.

Race Rankings – Returns a list in ascending order for the race to the ATP/WTA finals.

Rankings – Returns a rankings list in ascending order for singles competitors.

Season Info – Provides detailed information for a given season/tournament, including competitors and structure.

Season Links – Provides information about linked cup rounds for a given season/tournament. This feed can be used to compile advancement brackets.

Season Summaries – Provides schedule information and scoring for all matches from a given season

Seasonal Competitors – Provides a list of competitors for a given season.

Seasonal Probabilities – Provides 2-way win probabilities (home team win, away team win) for all matches for a given season.

Seasons – Provides a complete list of historical season information for all supported competitions in the API.

Sport Event Summary – Provides scheduling information, scoring, and statistics for a given match.

Sport Event Timeline – Provides scheduling information, scoring, statistics and a play-by-play event timeline for a given match.

Sport Events Removed – Provides ids for sport events that have been removed or deleted.

Sport Events Updated – Provides ids for sport events that have been updated in the last 24 hours.

Updated 11.03.21

Push Events – Returns detailed, real-time information on every game event

Push Statistics – Returns detailed game stats at the doubles team or player level

Live Probabilities * - Provides top-level information for live matches. If probabilities are available for a match, pre-match and live probabilities will be displayed.

Season Outright Probabilities * - Provides a list of outright probabilities for each team from a given season.

Sport Event Probabilities * - Provides pre-match and live probabilities for a given match.

Sport Event Upcoming Probabilities * - Provides a list of IDs for upcoming sport events in the next 24 hours.

Timeline Probabilities * - Provides a timeline of pre-match and live probability changes for a given match.

* - Available only with the probabilities plan within the Tennis v3 package. See FAQ for details.

Updated 11.03.21

Tennis v3 Failover Information

If our scout feed goes down or becomes unavailable, Sportradar takes over Live Data Entry (LDE) to provide a failover.

In case of a failover, we follow one of the following scenarios:

1. *Continue point-by-point coverage – but lose service outcomes*. During the failover we cannot provide data related to service outcome. The following data will be unavailable: aces, double faults, and successful service outcome. Those statistics will be verified and updated post-match.

2. *If point-by-point coverage is not possible – we will update game-by-game, post-match. During the failover we cannot provide point-by-point coverage and service outcomes. The following data will be unavailable: aces, double faults, and successful service outcome. Missing point-by-point coverage and statistics will be verified and updated post-match. Tie-break score will not be displayed. Game-by-game coverage will continue as each match ends.*

Language Support

We provide support for a large set of languages. The language support primarily affects names of players, teams, tournaments etc. Different languages are obtained through different endpoints where the only difference is the language part of the path. The language part is any valid ISO-646 language code. For languages we don't provide specific translations for we return the names in English.

Code	Language
it	Italian
en	English
de	German
fr	French
se	Swedish
es	Spanish
ru	Russian
zh	Chinese (simplified)
zht	Chinese (traditional)
ja	Japanese
hi	Hindi
tr	Turkish
no	Norwegian
da	Danish
nl	Dutch
pt	Portuguese
fi	Finnish
th	Thai
hu	Hungarian
sr	Serbian
id	Indonesian
ko	Korean
srl	Serbian Latin

When translations are available, the following terms will be translated:

competitor name
competition name
sport name
category name
season name
group name
player name
venue name
venue city_name
venue country_name
info prize_currency

Frequently Asked Questions

Q: How can I find the values for various enum data points within the API?

A: Many enum values are listed in the FAQ below. For the most up-to-date values, please see the Schema section of the OpenAPI specification here: https://api.sportradar.com/tennis/trial/v3/openapi/swagger/index.html

Q: What is the Date format?

A: When we present date only values we present these in the ISO 8601 standard format.
ex: 2013-04-03

We use these for attributes that have date and no time (such as birthdate). For more information: https://en.wikipedia.org/wiki/ISO_8601

Q: What time zone are the date time fields presented in?

A: All of our Date/Time attributes are in UTC, presented in the ISO 8601 standard format.

ex: 2013-04-03T18:15:00+00:00

For more information: https://en.wikipedia.org/wiki/ISO_8601

Q: What competitions are covered?

A: We cover the following competitions with the following coverage:

Tier 1: Grand Slams
Point-by-point live coverage for men's, women's, singles doubles, mixed doubles
Standard Match statistics live
Detailed service outcomes
Extended match statistics for quarter finals onwards for men's and women's singles (winners, errors, unforced errors broken down by a few shot types)
Post-match corrections
Court information

Tier 2: ATP1000, ATP Finals, ATP 500, ATP Cup WTA Finals, WTA 1000, WTA 500, WTA Elite Trophy, WTA Premier Fed Cup (World Group), Davis Cup (World Group)
Point-by-point live coverage for men's, women's, singles doubles, mixed doubles
Standard match statistics live
Detailed service outcomes
Post-match corrections
Court information

Tier 3: ITF
Point-by-point from Round 1
Standard Match Stats, (no detailed service outcomes)
No post-match corrections
No guaranteed court information

Tier 4: ATP250, WTA Int, WTA 250, WTA125k
Standard Match Stats from semifinals
Point-by-Point from semifinals

Q: When are standard match stats available?

A: Standard match stats are available whenever live point-by-point coverage is true.

Q: What are the standard match statistics?

A: Here are the available standard match stats?

    games_won
    max_games_in_a_row
    max_points_in_a_row
    points_won
    breakpoints_won
    total_breakpoints
    first_serve_points_won
    first_serve_successful
    aces
    double_faults
    second_serve_successful
    second_serve_points_won

Q: What are the definitions for the various statistics?

A: Here are the definitions for the various statistics:

General definitions:

- Racket arm: The arm with which the player serves and holds the racket. It is used to define if a player is right-handed or left-handed.
- Stroke/Shot: The act of striking the ball with the racket.
- Serve: Short for Service.
- Server: The player who serves.
- Returner/Receiver: The player who receives the serve.
- Return: A shot used to hit back the serve.
- Forehand: A shot hit from the racket-arm side of the body. The stroke used to return balls hit to the right side of a right-handed player and to the left side of a left-handed player. Forehands are commonly hit one-handed.
- Backhand: A stroke in which the ball is struck on the opposite side of the body to the racket arm. The stroke is used to return balls hit to the left side of a right-handed player and to the right side of a left-handed player. Backhands are hit either one-handed or two-handed.
- Groundstroke: A stroke made after the ball has bounced. The standard shot in tennis. Can be either forehand or backhand.
- Volley: During play, a shot where the ball is hit before it bounces. Can be either forehand or backhand.
- Overhead: During play, a stroke made with the racket above the head in a motion similar to that of an overhand serve.
- Drop Shot: A softly hit ball (usually with backspin) that drops near the net after crossing it. Is hit either as a groundstroke or a volley and can be either forehand or backhand.
- Lob: A stroke that lifts the ball high in the air, usually over the head of the opponent at the net. Is hit either as a groundstroke or a volley and can be either forehand or backhand.

Sportradar Definition – Winners

- Winner: A winner is any shot that is hit successfully into the opposite side of the court that the opponent can't manage to get a shot at. It can either be a clean hit without any racket touch or where the opponent only manages to

slightly touch the ball (racket clip). Important is that the opponent cannot manage to hit a proper shot. All the below specifications count as Winners in Statistics.
• Ace: A ball that is served without an opponent (receiver) touching the ball with the racket (usually due to well executed serve)
• Return winner: A direct winner hit when returning serve. Can be either forehand or backhand.
• Groundstroke winner: A winner hit as a groundstroke. Can be either forehand or backhand.
• Volley winner: A winner hit as a volley. Can be either forehand or backhand.
• Overhead winner: A winner hit as an overhead shot.
• Drop shot winner: A winner hit as a drop shot. Has to be either groundstroke or volley and can be either forehand or backhand.
• Lob winner: A winner hit as a lob. Has to be either groundstroke or volley and can be either forehand or backhand.

Sportradar Definition - Forced errors

• Forced error: An unsuccessful shot caused by an opponent`s good play. Primarily defined when the player who made the error is under time pressure or is on the move/on the defense during the shot execution. If one of those factors is true, then the player was forced into a difficult situation by a good shot and thus made a forced error. All the below specifications count as Forced Errors in Statistics.
• Return forced error: A forced error caused by an opponent`s serve, player gets racket to the ball but is unable to put it in play (incl. Racket Clip).
• Groundstroke forced error: A forced error while trying to hit a groundstroke. Can be either forehand or backhand.
• Volley forced error: A forced error while trying to hit a volley. Can be either forehand or backhand.
• Overhead forced error: A forced error while trying to hit an overhead shot.

Sportradar Definition - Unforced errors

• Unforced error: An unsuccessful shot due to an error without being forced under pressure by the opponent. All the below specifications count as Unforced Errors in Statistics.
• Double fault: Two faults served in a row. On a double fault, the server loses the point.
• Return unforced error: An unforced error while trying to hit a return of serve. Can be either forehand or backhand.
• Groundstroke unforced error: An unforced error while trying to hit a groundstroke. Can be either forehand or backhand.
• Volley unforced error: An unforced error while trying to hit a volley. Can be either forehand or backhand.
• Overhead unforced error: An unforced error while trying to hit an overhead shot.
• Drop shot unforced error An unforced error while trying to hit a drop shot. Has to be either groundstroke or volley and can be either forehand or backhand.
• Lob unforced error: An unforced error while trying to hit a lob. Has to be either groundstroke or volley and can be either forehand or backhand.

Q: How long are matches stored in the deleted/updated matches endpoints?

A: The deleted/updated matches endpoints will show sport events removed or updated in the last 2 weeks.

Q: How do venues work for country vs country competitions?

A: In country vs country competitions such as Davis Cup and ATP Cup, venues on the parent matches refer to the complex in which the courts are located. On the child match level, venue refers to the court where the match is played. Note that only the finals venue will be linked to complex attribute for the Davis Cup competition.

Q: How does sport event type work in the feeds?

A: The sport_event_type explicitly denotes the match type. Where there are competitions which have "parent matches" and "child matches" where country_format='true', such as Davis Cup and ATP Cup, this attribute will only appear on the "child match" node. The "parent match" sport_event node will have a "type='parent'" attribute and the "competition" node will have a "type='mixed'" attribute. Otherwise, for competitions where "country_format" is not present, the competition will have a type either "singles" or "doubles".

Q: How do I detect when one player has "advantage" in the case where the players both reached "40" or "deuce"?

A: The player who has "advantage" will have a score of "50" in the timeline, for example this is how a game was won by the receiver after a server committed a double_fault when the receiver was at "advantage":

```
<event id="691865865" type="point" time="2020-05-
29T11:30:37+00:00" home_score="50" away_score="40" server="away" result="double_fault" firs
t_serve_fault="true"/>
    <event id="691866221" type="period_score" time="2020-05-
29T11:31:22+00:00" period="2" home_score="4" away_score="4" server="away" result="receiver_
won"/>
```

In addition, when in a live situation the "game_state" node will display the following:

```
<game_state home_score="50" away_score="40" serving="away" last_point_result="receiver_winn
er" advantage="home" tie_break="false"/>
```

Q: Why do some players have height and weight data and others don't?

A: Only the height and weight of the top 500 ranked players for ATP and WTA are included. There may be some instances where some players outside of the top 500 have these attributes but should not be relied upon.

Q: What are the valid sport_event_status – status values?

A: Status values can change over time, and new values may be added when needed. Here is a list of the currently valid status values and their definitions:

not_started – The match is scheduled to be played
started – The match has begun
postponed – The match has been postponed to a later time
match_about_to_start – The match time has expired, awaiting play
live – The match is currently in progress
closed – The match results have been confirmed.
ended – The match is over
interrupted - The match began, but coverage has stopped for a short time. Note that match scores may not be updated during this period, the last recorded match score will be displayed instead
suspended – The match began, but has been suspended to a later time
cancelled – The match has been cancelled and will not be played
delayed – The match has been temporarily delayed and will be continued

Updated 11.03.21

Q: What are the valid sport_event_status – match_status values?

A: Match status values can change over time, and new values may be added when needed. Here is a list of the currently valid match status values and their definitions:

not_started – The match is scheduled to be played
match_about_to_start – The match time has expired, awaiting play
start_delayed – The match has been temporarily delayed and will be continued
1st_set – First set
2nd_set – Second set
3rd_set – Third set
4th_set – Fourth set
5th_set – Fifth set
ended – The match is over
walkover – The match ended in a walkover
interrupted – The match began, but is stopped for a short time
suspended – The match began, but has been suspended to a later time
cancelled – The match has been cancelled and will not be played
postponed – The match has been postponed to a future date
retired – The match is incomplete as the result of one player
defaulted - The match has ended as a result of one player being disqualified

Q: How do I find out the coverage for a particular match?

A: Find the node called: "coverage – type" which denotes if the match is covered at the sport_event or competiton level. When type="sport_event" you will only get sport_event_properties. When type="competition" you will get sport_event_properties and competition_properties. Within coverage, scores states if the match is scored live or post. Extended stats show if we have enhanced stats for the sport event.

Q: Is the statistical data provided in the Tennis API official data?

A: Sportradar collects sports data independently. For some sports Sportradar is the official data provider. In the case of Tennis, we provide official data for ITF tournaments only.

Q: What prompts a match to appear in Sport Events Updated?

A: Changes to score, match status, or schedule in last 24 hours would cause a match to display in this endpoint.

Q: How will a sport event behave when it is not covered with live scores?

A: When a sport_event is not covered live, the status and match_status will remain as not_started until results are entered post-match.

Q: How are "live" feeds handled in the API?

A: Sport Events appear in the feed 10 minutes before the scheduled start time and are removed 10 minutes after the Sport Event is ended.

Q: What is the probabilities package?

A: The probabilities package is an add-on set of feeds that are an extension of the Season Probabilities feed in the main package (which already provides pre-match probabilities for the sport event winner market). The main features of the Probabilities extension are: Live Probabilities that update throughout game, Season Outright Probabilities for the Tournament Winner market, and Live Probabilities Coverage indicator for the next 24 hours.

Updated 11.03.21

Q: Is there Live Probability coverage for every game you cover in the Tennis API?

A: Live Probability coverage depends on a number of factors, and we can't guarantee that every game will be covered for any given competition. However, Sportradar covers tens of thousands of sport events across hundreds of leagues. For individual competition coverage, contact sales@sportradar.com

Q: Why can't I find a particular match in Daily Summaries or Sport Events Updated feeds?

A: These endpoints support pagination and return 200 entries by default. To return more matches, an additional query string parameter must be used after your API key. For example, appending *&start=200* will return the next 200 entries per page, *&start=400* will return the next 200, and so on.

Document Change History

Date	Section	Change
11/03/2021	Competitor Information	Added bracket number, qualification path, and seed at the competitor level for relevant tournaments.
	Competition Information	Added 'alternative_name' attribute to provide common tournament names.
		Added surface type for complexes.
	Competition Information	
	Competitor Information	Added data points in support of the new Season Standings feed.
	Standings & Ranking Information	
10/15/2021	FAQ	Added a pagination support description for the following feeds: Daily Summaries, Season Summaries, Sport Events Updated.
06/04/2021	Category & Sport Information	
	Competition Information	
	Competitor Information	Added data points to support the addition of the following probabilities feeds: Live Probabilities, Season Outright Probabilities, Sport Event Probabilities, Sport Event Upcoming Probabilities, Timeline Probabilities.
	Venue Information	
	Probability Information	
	Sport Event Information	
	Competition Information	Added data points to support the addition of the Season Links feed.
	Sport Event Information	
	Competition Information	Added data points to support the addition of the Doubles Competitions Played feed.
	Competitor Information	
	FAQ	Added additional FAQ information.
02/24/2021	Competitor Information	
	Sport Event Information	
	Match Statistics Information	Added support for the Push Events and Push Statistics feeds for Tennis v3.
	Timeline Information	
	Metadata Information	
12/03/2020	All	Initial release for Tennis v3.
